PROTECTION:

EXTINGUISHING MEDIA: Water spray, dry chemical, foam, carbon dioxide.

SPECIAL FIRE FIGHTING PROCEDURES: Prevent human exposure to fire, fumes, smoke, and products of combustion. Evacuate non-essential personnel. Firefighters should wear full face, self-contained breathing apparatus and impervious protective clothing. A direct stream of water may cause foaming. Use water to cool containers exposed to fire.

UNUSUAL FIRE AND EXPLOSION HAZARDS: Hot organic chemical vapors may spontaneously ignite or explode when mixed with air, even at temperatures below their published autoignition temperature.

HAZARDOUS DECOMPOSITION PRODUCTS:

SECTION 6: ACCIDENTAL RELEASE MEASURES

ACCIDENTAL RELEASE MEASURES: Evacuate non-essential personnel, eliminate ignition sources, and wear protective equipment (See Section VIII). Shut off source of leak only if safe to do so. Contain Spill. Recover free product. To clean up residue, flush sparingly with water or use an absorbent. Avoid runoff to ground water, and sewers. It may be necessary to remove contaminated soil. If product is flammable or combustible, use non sparking tools. If acidity (low pH) is a problem neutralize with dilute acetic acid or dilute hydrochloric (Muriatic) acid. If required, notify state and local authorities. Product may be toxic to fish or aquatic life.

DISPOSAL METHOD: Solids must be disposed of in a permitted waste management facility. Recovered liquids may be reprocessed

SECTION 7: HANDLING AND STORAGE

HANDLING AND STORAGE: Keep container closed when not in use. Do Not store above 120 deg. F. Keep out of reach of children.

OTHER PRECAUTIONS:

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

ENGINEERING CONTROLS: Mechanical general ventilation is usually adequate.

VENTILATION: Local mechanical ventilation may be required.

RESPIRATORY PROTECTION: None normally required. Traces of ethylene oxide and/or propylene oxide could accumulate in headspace of drums, storage/transport vessels or in enclosed areas where the product is being handled or used. If the product is handled according to the recommendations set forth in this Material Safety Data Sheet, the presence of trace amounts is not expected to result in any short or long term hazard. Ethylene oxide and propylene oxide are considered by OSHA as potential carcinogens and reproductive hazards for humans. Jack’s Magic urges that uses of this product confirm that their operating, storage, and distribution facilities comply with the OSHA Standard (29 CFR 1910.1047), and that personnel be monitored to determine levels of exposure.

EYE PROTECTION: Safety glasses with non-perforated side shield. Always wear eye protection when working with chemicals. Do not wear contact lenses when working with chemicals.

SKIN PROTECTION: Impervious gloves
OTHER PROTECTIVE CLOTHING OR EQUIPMENT: Safety shower, eye wash fountain, and washing facilities should be readily available.
